

with regard to the relations more nearly  
compared with what has appeared  
on the discolored  
I send the account of the fossils to the  
Athensian but he did not send out  
what I said about the products of the  
dolomite which certain occupied  
me half of his time & in which  
he did some good things indeed  
but did not always agree about the cause

J. E. Gray

British Museum  
22 Sept 1866  
Dear Dr Gray  
Thanks for the volume of  
Sully's General & the  
Manuscript in the Journal of Science  
rather than the interesting account  
of Dr Harvey & Greville. The account  
of Dr Harvey in the Athenaeum was  
by Dr Percival Wray but I  
wrote of some for information  
furnished by Dr Harvey, brother in law  
I thought the visit to Oregon was a  
mistake but could not correct it  
The account which Harvey gave  
me of the Voyages ended with "abandoned  
other places in the Pacific"
